

## CONNECTION BOX

### Discription:

- CAT6 – CAT6A network cable connection Network extension to connect 2 installation cables.
- Support POE (Power Over Ethernet, power over network cable). All standard 4- or 8-conductor installation cables available on the market from AWG 26-22 up to a sheath diameter of 10 mm can be laid
- For category 5e, 6, 6A and 7 cables with solid conductor (laying cable), connection by LSA connection technology, with strain relief
- An installation cable can be extended using the extension module, or a damaged cable reconnected, without having to lay a whole section of cable again. To do this, connect the 2 ends of the cable using self-stripping LSA terminals.

### Application:
