

1. Introduction:

2. **TS-FTB-16/24P OUT** is widely applied in FTTH network, telecommunication network, CATV network, datacommunication network and local area network(LAN).

3. Product features:

- Industry Standard User Interface, is made of high impact plastic.
- Light and handy with easy maintenance, has special key-operated switches.
- Anti-UV, Ultra violet resistant and rainfall resistant.
- Splicing tray is divided into two parts, which is bilevel and turnable.
- Splicing: 12~24cores.
- 3 inlet ports, 16 or 32 outlet ports.
- Can accommodate PLC splitter and box style splitter. Max splitting :1: 16.
- Can be used in indoor and outdoor, Wall-mounting.

4. Main technical specifications:

- Max size (D×W×H) : 335 × 296 × 117mm
- Weight: 1.75 kg
- Radius of curvature: ≥40mm
- Splice tray excess loss: ≤0.01dB
- Stored coiling fiber length: ≥1.6m
- Max capacity (single fiber) : 24 cores
- Temperature range: - 40°C ~ + 70°C
- Lateral compression resistance: ≥2000N / 10 cm
- Impact resistance: ≥20N.m
